

## Network Rail - Company Standards Online

Company Standards are a vital online source of information for any organisation working in the railway industry.

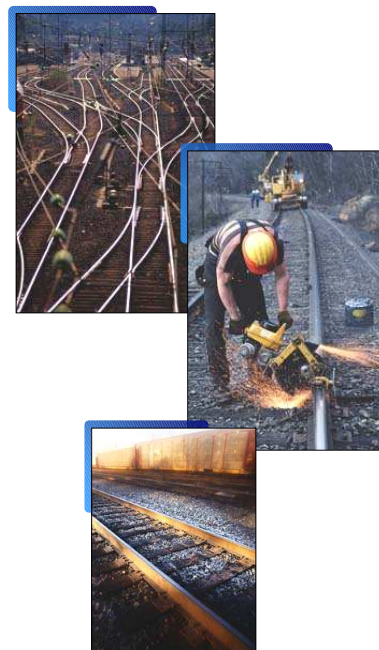

Designers, contractors and engineers can view essential information in high resolution, from an easy-to-use electronic reference library. Key search fields include document number, title and full text. This combined with an advanced search engine gives instant desktop access to the precise standard you want.

### In partnership with Network Rail

IHS Technical Indexes works in partnership with Network Rail to continually improve and enhance the user-friendly service for company standards.

### Product content:

- Company standards catalogue
- Product specifications
- Procedures
- Codes of practice
- Work instructions
- Guidance notes
- Technical instructions
- Briefing note
- Mandatory requirement sheets
- SSI applications manual
- IECC applications manual
- Special inspection notices (SINS)
- Indexes of documents relating to track and signalling equipment
- Indexes of documents relating to electrical distribution and electromechanical plant engineering activities
- Some former British railways board documents
- Indexes of DC electric track equipment drawings
- Standards engineering drawings.

### Features and benefits:

- Access to the complete set of Network Rail approved Company Standards
- Powerful search software allows easy PDF retrieval – the image you see is 100% accurate
- Search on document number, document title, full text, and other key fields.
- Use wildcards to narrow or broaden your search criteria
- Make your own favourites groups to personalise your data searches
- Accessible from anywhere, at any time (subject to licensing and internet connection)
- Zero maintenance - updates to the database are automatically incorporated
- Company Standards are normally updated at two-month intervals. To ensure subscribers are kept right up-to-date, every new issue details news and changes since the previous issue.
