

The Construction Information Service

The Construction Information Service is an expert knowledge tool that delivers key technical information critical to all construction projects in one easy-to-use on-line package.

Developed by IHS and NBS, The Construction Information Service provides instant full-text access to current regulations, standards, technical advice and a vast array of related news and briefings.

Fully searchable, intelligently classified and constantly updated, it's an indispensable source of key information, tailored to meet your real needs.

Industry Partners

In order to provide an authoritative service IHS has secured a number of agreements with key institutes and organisations. These ensure that critical publications and online information resources are available with thousands of other guidance documents as a one-stop service:

- AJ
- BRE press
- BSRIA
- CIOB
- CIRIA
- IStructE
- LABC
- SCI
- The Concrete Society
- TRL

In addition we provide access to a selection of their online resources:

- SCI (The Steel Construction Institute) - Access to Steelbiz, Access Steel & e5950
- The Concrete Society - Advisory Service, Fingertips and Reference section
- EMAP Construct - Access to AJ, NCE & Construction News
- LABC - Access to LABC Type Approval

If you are involved with the design or construction of any type of structure from housing to bridges and do not currently subscribe to The Construction Information Service, come and see what we can offer you...

The Construction Information Service – Index-Only is a database of bibliographic records for more than 26,000 construction documents. Unlike Internet search engines **The Construction Information Service – Index-Only** is 100% relevant; it will help you identify the current versions of regulations and construction standards, and highlight supporting material. It is updated weekly and our expert editors make sure the content matches your requirements. Take a look for yourself www.uk.ihs.com/cisindexonly
