

ESH Management Solution

The Source
for Critical Information and Insight™

Environmental, Safety & Health (ESH)
Management Solution

There is an immense amount of diverse environmental, safety, health, and transportation related information you need to stay current on to maintain compliance and ensure a safe working environment. The Environmental, Safety & Health (ESH) Management Solution provides single-system access to comprehensive, current and historical codes, laws, regulations and standards from international, federal, state and industry sources.

The ESH Management Solution combines CyberRegs™ and IHS Specs & Standards. Linking between regulations and standards integrates diverse data for immediate access. Inclusion of updated industry standards and codes improves ESH programs to meet and exceed compliance requirements.

Regulations

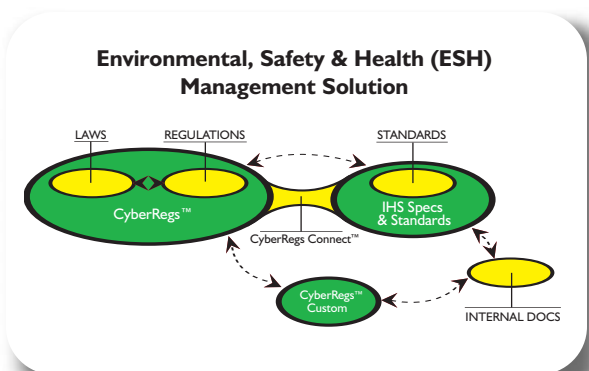

The core information requirements for any Environmental, Safety and Health professional are laws and regulations. CyberRegs™ provides a single source to a comprehensive library of U.S. and non-U.S. laws and regulations – including international, federal, state and local jurisdictions.

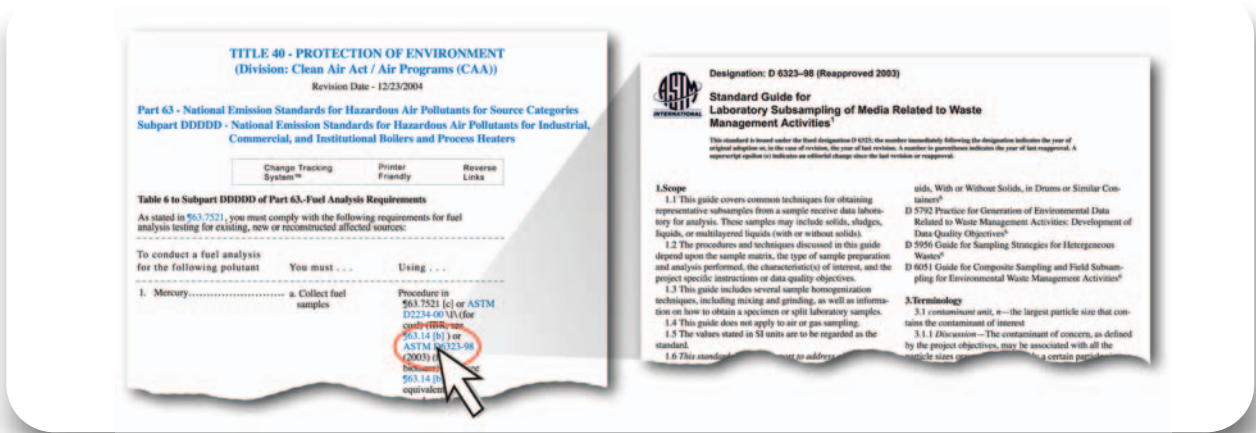

The regulatory agencies responsible for the regulations in these jurisdictions incorporate references to industry standards within their documents. These standards can

be interpreted as implicit regulations through the legal system. They carry the weight and force of law and are a critical component of any compliance activity.

Standards

The IHS Specs & Standards Service contains industry standards and codes from more than 370 standards developing organizations worldwide. Compliance standards solutions are available for both Safety and Environmental compliance to optimize your company's ESH programs — or create your own Custom Collection of standards to meet your specific needs. Standards are in an indexed, easy-to-search tool so that you can always locate the exact standard you need when you need it.

ESH Management Solution

With the ESH Management Solution, CyberRegs and IHS Specs & Standards are bridged together into a single system with CyberRegs Connect™, providing direct linkage to industry standards from the regulation for complete and seamless access to all of the documents needed for ESH compliance.

CyberRegs Custom offers additional functionality that allows customers to further integrate and link the laws, regulations and standards from their internal company documents and systems.

ESH Management Solution Content

- Environmental, safety, health, and transportation regulations, statutes and proposed regulations are available for North America (U.S. including every state, D.C. and Puerto Rico, Canada including many Provinces, and Mexico), Europe (including Germany, Poland and European Council Directives in several languages) and several other countries throughout Asia, Europe, the Pacific Rim and South America.
- Worldwide ESH Industry standards are available in collections that are automatically updated and searchable by document number, keyword, or organization.

- International laws and regulations are provided in the local language.

ESH Management Solution Functionality

- Change Tracking System™ enables advanced comparison between current archived documents by providing a detailed, color-coded display of the differences. Users can achieve proactive compliance while viewing potential and actual changes that may affect key decisions.
- RegMatch™ enables you to find matching documents, federal to state, state to federal, or state to state by using an advanced key word search.
- The CyberRegs Connect upgrade includes an integrated system that links laws and regulations to referenced industry standards.
- Early Warning Service sends a daily or weekly email based on a personal profile you create to alert you of regulatory changes, expediting awareness of changes that may impact your processes or programs.
- Regulatory forms have been made interactive, simplifying filing requirements.
